

WIOTT 2022

October 14-16, 2022
Tokyo, Japan

THE 2ND WORKSHOP ON INTERNET OF THINGS TECHNOLOGIES

Internet of Things (IoT) is a platform and a phenomenon that allows everything to process information, communicate data, analyze context collaboratively and in the service of individuals, organizations and businesses. In the process of doing so, a large amount of data with different formats and content has to be processed efficiently, quickly and intelligently through advanced algorithms, techniques, models and tools. The 2nd Workshop on Internet of Things Technologies (WIOTT 2022) will be held in **Tokyo, Japan** during **October 14-16, 2022**.

CALL FOR PAPERS

Topic area 1: IoT Experimental and Deployment

- IoT and Future Internet Architectures
- IoT System Modeling and Analysis—Performance
- Real case deployment scenarios and results

Topic area 2: IoT Applications and Services

- Architectures of IoT services
- Smart supply chain and framing
- Business models for IoT applications

Topic area 3: Connectivity, Security, and Privacy for IoT

- IoT architecture with 5G and beyond networks
- Cooperative communication techniques for IoT
- IoT short range communications

Topic area 4: Electronics and Signal processing for IoT

- IoT low power devices
- IoT sensors and actuators
- Energy optimization in IoT
